

Release notes for Price Tables

What's New

We have taken the price tables that COMTELL customers have come to rely on into a new era. The enhanced capabilities of price tables are intended to bring a level of customization and efficiency to price tables that clients have never seen before. (Graphic included goes into more detail on features). Additional tables will be added throughout the remainder of the year and into next year.

Current tables include:

- U.S. Chicken Market
- U.S. Turkey Market
- U.S. Boxed Beef Market
- U.S. Shell Egg Market
- U.S. Egg Inventory
- U.S. Pork Market

Coming soon:

- U.S. Red Meat Slaughter Table
- Salmon Market

Many more to follow across red meat, poultry, seafood and other categories!

Key features:

1. All items for a particular market aggregated into one table
2. Collapsible Rows
3. Show/Hide Columns
4. Moveable Columns

*2-4 Are all intended to help the client remove the noise from price tables and allow them to focus exclusively on the items that mean the most to them.

Custom Tables

Custom tables allow the client to build a personalized table or “watch list” of items that mean the most to them. This feature currently closely matches the functionality of Mintec Analytics My Price Change Reports and future developments will bring it closer to the abilities of COMTELL’s MyItems.

Key features:

5. Create unlimited groups to accommodate a diverse range of needs
6. Easily add items to table with our intuitive series finder tool
7. Quickly gauge historical performance of your items with percentage comparisons to last week, month, and year.
